Reaction Class

Director: Stephen Markus, MD

US BioTek Laboratories' proprietary ELISA analyses are designed to assay specific total IgG (subclasses 1, 2, 3, 4), total IgA (subclasses 1, 2), and IgE antibodies. The classification of 0 to VI denotes the level of IgG, IgA, and/or IgE antibodies detected through spectrophotometric analysis. The antigens on the panel are subject to change without prior notice. Reference ranges are updated periodically.

This test was developed and its performance characteristics determined by US BioTek Laboratories, Inc. It has not been cleared or approved by the U.S. Food and Drug Administration.
